

Jerson Patrick Valdez

Bulacan, PH|09091805447|valdezjersonpatrickc@gmail.com|jerson-valdez.vercel.app|linkedin.com/in/jerson-valdez

Objective

Detail-oriented UI Designer and Front-End Developer with a strong foundation in full-stack and mobile application development. Proven ability to build and deploy complex, user-centric systems. Experienced in direct client development, notably engineering an AI-enhanced procurement capstone system for the Bulacan State University College of ICT, utilizing scikit for optimized, history-based budget reallocation. Seeking a software development position to leverage hands-on experience while actively learning how industry teams collaborate, ship at scale, and optimize software—driven by a commitment to continuous growth and effectively serving my team.

Education & Credentials

Bachelor of Science in Information Technology (BSIT) | Jul 2023 - Aug 2027

Bulacan State University - Main Campus

- Specialized in Web and Mobile Application Development (WMAD)
- President's Lister (Academic Year 2025) and Dean's Lister (Academic Year 2024).
- HS & SHS Awards: Best in Capstone | Best in Science | Consistent with high-honor (San Pedro NHS)

Technical Skills

- Languages:** TypeScript, JavaScript, Python, Java, PHP, HTML/CSS
- Frameworks & Libraries:** React, Tailwind CSS
- Databases & Backend:** MySQL, MS SQL, Firebase, Supabase
- Developer Tools & Platforms:** Git, GitHub, Android Studio, Unity, Figma, Vercel, Vite, XAMPP, InfinityFree
- Specialties:** UI/UX Design, Front-End Architecture, Progressive Web Apps (PWAs), API Integration

Engineering Experience & Projects

Freelance Web & Applications | Software Developer

- Commissioned by external clients to architect, troubleshoot, and optimize full-stack web applications and complex database schemas.
- Developed custom Java desktop applications for academic projects, ensuring robust data structures and reliable system performance.

natural-feeder-ph.app | Full-Stack Developer (Ongoing)

- Building a live e-commerce marketplace for a local agricultural business, including an administrative dashboard to monitor daily revenue and expenses.
- Engineered a frictionless guest-checkout workflow that bypasses mandatory account registration to reduce friction and optimize the customer ordering process.

CICT-PPMP Procurement System | Full-Stack Developer

- Engineered a web-based application to manage and track the lifecycle of university purchase requests, budget reallocation, and supplemental budget injections.
- Designed data architecture to analyze resource reallocation patterns and streamline internal academic procurement workflows.

Labable Laundry Management System | Front-End Developer & UI Designer

- Co-designed and developed a comprehensive web and mobile management platform tracking complex transaction workflows.
- Spearheaded the user interface design and front-end code, establishing clear service tiers and intuitive data flows for end-users.

Certifications

Salesforce Supported Virtual Internship Program - Salesforce Developer Track | Aug 2025 - Jan 2026

SmartBridge / Salesforce / BuISU

- Completed enterprise application development training in Apex, Visualforce, Lightning Web Components (LWC), and Agentforce Essentials; built declarative automation workflows and data security models.

Cisco Networking Academy Badges & Certificates

- Completed technical certifications in Basic Network Support and Security, Device Configuration, IoT, and Operating Systems.
